## FIFA 13

### Description

*FIFA 13* captures all the drama and unpredictability of real-world football. The game creates a true battle for possession across the entire pitch, delivers freedom and creativity in attack, and connects fans to the heartbeat of the sport — and to each other — through EA SPORTS Football Club. *FIFA 13* features five breakthrough gameplay innovations which revolutionize artificial intelligence, dribbling, ball control and physical play, as well as engaging online features and live services. This year marks the largest and deepest game in FIFA history and elevates the role of the franchise as Football's Social Network, where fans connect, compete and share with millions of others around the world.

All-new **Attacking Intelligence** infuses players with the most sophisticated artificial intelligence ever achieved. Players have the ability to analyse space, work harder and smarter to break down the defence, and think two plays ahead. Now every touch matters with the most comprehensive and intuitive dribbling system ever developed for the franchise. Inspired by the world's best player, Lionel Messi, **Complete Dribbling** enables players to face their opponent and use precise dribble touches combined with true 360° mobility with the ball, so it's easier to be more creative and dangerous in 1v1 opportunities. **FIFA 13 First Touch Control** transforms the way players control the ball, eliminating near-perfect touch for every player on the pitch, and creating more opportunities for defenders to win back possession. The second generation of the **Player Impact Engine** expands physical play from just collisions to off-the-ball battles between players. Defenders can push and pull for position, and utilise their size and strength to force opponents into poor touches and decisions before the ball arrives. **FIFA 13 Tactical Free Kicks** provides the tools to create dangerous and unpredictable free kicks. Position up to three players over the ball and utilise dummy runs and more passing options to outwit your opponent.

### Key Features

- **Attacking Intelligence**— All-new positioning intelligence infuses attacking players with the ability to analyse plays, and to better position themselves to create new attacking opportunities. Players will work harder and smarter to break down defences, make runs that pull defenders out of position, and open passing channels for teammates. Plus, players possess an off-the-ball vision and the ability to think two plays ahead to create, curve, or alter runs to capitalize on openings as they occur.
- **Complete Dribbling**— Make every touch matter with complete control of the ball. Take on defenders with the freedom to be more creative in attack. Players are more explosive accelerating with the ball, and utilise precise dribble touches with true 360° mobility with the ball while facing a defender. Face an opponent to threaten attack while moving with the ball in any direction to dodge tackles, or turn and shield the ball, holding off defenders for longer stretches.
- **FIFA 13 First Touch Control**— A new system eliminates near-perfect control for every player by creating uncertainty when

receiving difficult balls. Poor passes are harder to control, enabling defenders to capitalize on errant balls and poor touches. Factors such as defensive pressure, trajectory of the ball, and velocity of the pass all factor into a player's success. Players with better control and skill stand out. Fewer perfect touches, the potential to over hit passes, more loose balls, and greater balance between defending and attacking.

- **Player Impact Engine**—The second generation of the award-winning physics engine expands physical play from just collisions to off-the-ball battles, giving defenders more tools to win back possession. Defenders can use their body to win possession, push and pull for position, and utilise their size and strength to force opponents into poor touches and decisions before the ball arrives.
- **FIFA 13 Tactical Free Kicks**—Create dangerous and unpredictable free kicks. Position up to three attacking players over the ball and confuse opponents with dummy runs, more passing options, and more elaborate free kicks. Opponents can counter by adding or subtracting players to the wall or sending a bullet man to intercept the pass or block the shot.
- **EA SPORTS Football Club**—Earn rewards, level up, enjoy live Challenges based on real-world soccer events, and connect with friends. Everything within *FIFA 13*, and against friends, is measured in a meaningful way. Earn rewards to unlock items like kits, special celebrations, Virtual Pro Attribute Boosts, and Career Mode Super Scout Credits from the new Football Club Catalogue. Plus, build status as you climb 100 levels. Real-world storylines drive regular challenges so that *FIFA 13* will play like the real-world season. Support Your Club and compete against rivals in every area of the game, lifting your club higher in the league tables or helping them avoid relegation.
- **EA SPORTS Football Club App For iPhone** — Access your Football Club identity and friends, manage your FIFA Ultimate Team, search the live auctions and bid to win new players.
- **Complete Authenticity**—500 officially licensed clubs and more than 15,000 players.
